# Agilent 2100 Bioanalyzer System

### **One platform – Endless possibilities**

The Agilent 2100 Bioanalyzer system offers fast and reliable separation, sizing and quantification of DNA, RNA and proteins by miniaturized on-chip electrophoresis surpassing labor intensive slab gels by speed, reproducibility and independence from user influences.

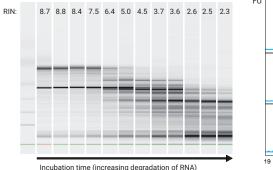

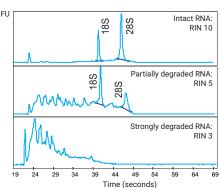

### **Key benefits**

- Sample quality control in multiple workflows, including sequencing, gene expression, biopharmaceuticals, and genome editing.
- Provides data on abundance, integrity, distribution, and impurities.
- Digital data with various data display options gel view, electropherograms, and tables – allow convenient analysis, archiving, and simple comparison of samples from multiple chips.
- Multiple exportable data formats (xml, csv, html, pdf, wmf, jpg, tif, bmp, and aia).
- Availability of compliance services and features.

### Ensuring high quality RNA for downstream applications

The Agilent 2100 Bioanalyzer system is a well-accepted standard for integrity measurements of RNA. In less than 30 minutes, total RNA, mRNA, or small RNA is checked for quantity and degradation. The unique RIN offers an objective measurement of total RNA quality to ensure reproducible results from downstream experiments, such as next generation sequencing, gene expression microarrays or qPCR.

# Agilent 2100 Bioanalyzer System

The Agilent 2100 Bioanalyzer system is a versatile system for sizing, quantification and quality control of DNA, RNA, and proteins on a single platform.

Agilent 2100 Bioanalyzer system

| Part number | Description   | Quantity |
|-------------|---|----------|
| G2939BA     | 2100 Bioanalyzer instrument<br>For electrophoretic assays only. Model number G2939B.<br>Includes the Bioanalyzer instrument, electrode cartridge, 2100 Expert software, instrument and electrophoresis licenses,<br>chip priming station, chip vortexer, test chips, accessories, and installation and familiarization services.<br>Note: Does not include PC. It is optional to add on the 2100 Expert SW laptop PC bundle for a fully validated system.<br>(Required for Security Pack installations) | 1 system |
| G2953CA     | 2100 Expert SW laptop PC bundle<br>Laptop PC with 2100 Expert software pre-installed.<br>Note: Required for Security Pack installations.  | 1 PC     |

#### Agilent 2100 Expert software

| Part number | Description  | Quantity  |
|-------------|--|-----------|
| G2946CA     | 2100 Expert software upgrade<br>Package for upgrade to the latest revision of 2100 Expert software.<br>Includes the required license keys to run the instrument.                     | 1 upgrade |
| G2949CA     | 2100 Expert Security Pack license<br>For CFR 21 Part 11 compliance.<br>Includes compliance software upgrade and license<br>Note: Requires 2100 Expert SW laptop PC bundle (G2953CA). | 1 license |

# Agilent 2100 Bioanalyzer System

#### Accessories and spare parts

| Part number | Description  | Quantity                |
|-------------|--|-------------------------|
| 5065-4413   | Electrode cartridge<br>Removable cartridge with detachable 16-pin electrode assembly for easy cleaning. For RNA, DNA, and protein assays.  | 1 cartridge             |
| 5065-9951   | Electrode cleaner kit<br>Includes additional electrode cleaners for the maintenance of the electrode cartridge.  | 7 electrode<br>cleaners |
| G2938-68300 | Test chip kit<br>For running instrument diagnostics and troubleshooting electrophoretic assays.<br>Includes autofocus chip, electrode/diode test chip, and documentation.                              | 1 kit                   |
| 5065-4401   | Chip priming station<br>Used to load gel matrix into a chip with a syringe provided in each assay kit – used for RNA, DNA, and protein assays.<br>Includes priming station, timer, and 1 syringe clip. | 1 kit                   |
| 5042-1398   | Adjustable clip for priming station<br>Used in combination with a syringe to apply defined pressure for chip priming.  | 1 clip                  |
| G2938-68716 | Gasket Kit for chip priming station<br>Includes 1 syringe adapter, 10 gaskets, and 1 mounting ring.  | 1 kit                   |
| 5185-5990   | Filters for gel matrix<br>Extra spin filters for the gel matrix in RNA, DNA, and protein assays.   | 25 filters              |
| 2110-0007   | Fuse for 2100 Bioanalyzer power supply<br>1 A / 250 V.   | 1 fuse                  |
| RS232-61601 | RS-232 cable<br>Connector cable between desktop or laptop PC and Agilent 2100 Bioanalyzer instrument.  | 1 cable                 |
| 5188-8031   | USB Serial adapter cable<br>Connects RS-232 cables to USB PC ports (for PCs without serial ports).   | 1 cable                 |

### Bioanalyzer DNA Kits and Reagents

The Agilent DNA kits, together with the Agilent 2100 Bioanalyzer system, are ideal for automated sizing and quantification of PCR fragments, restriction digests or fragmented DNA.

#### DNA kits and reagents

| Part Number | Description   | Quantity        |
|-------------|---|-----------------|
| 5067-4626   | High Sensitivity DNA kit<br>For the separation, sizing and quantification of dsDNA samples of limited abundance ranging from 50 to 7000 bp.<br>Includes 10 chips, reagents, ladder and consumables. | For 110 samples |
| 5067-4627   | High Sensitivity DNA reagents<br>Includes reagents and ladder; no chips.  | For 10 chips    |
| 5067-1504   | DNA 1000 kit<br>For sizing and quantification of dsDNA fragments ranging from 25 to 1000 bp.<br>Includes 25 chips, reagents, ladder and consumables.  | For 300 samples |
| 5067-1505   | DNA 1000 reagents<br>Includes reagents and ladder; no chips.  | For 25 chips    |
| 5067-1506   | DNA 7500 kit<br>For sizing and quantification of dsDNA fragments ranging from 100 to 7500 bp.<br>Includes 25 chips, reagents, ladder and consumables.   | For 300 samples |
| 5067-1507   | DNA 7500 reagents<br>Includes reagents and ladder; no chips.  | For 25 chips    |
| 5067-1508   | DNA 12000 kit<br>For sizing and quantification of dsDNA fragments ranging from 100 to 12000 bp.<br>Includes 25 chips, reagents, ladder and consumables.   | For 300 samples |
| 5067-1509   | DNA 12000 reagents<br>Includes reagents and ladder; no chips.   | For 25 chips    |

### Bioanalyzer RNA Kits and Reagents

The Agilent RNA kits and RNA Integrity Number (RIN) are widely accepted for RNA quality assessment. Perform fast, easy and precise integrity checks and sample quantification before any RNA-dependent application.

#### RNA kits and reagents

| Part number | Description   | Quantity        |
|-------------|---|-----------------|
| 5067-1511   | RNA 6000 Nano kit<br>For analysis and quantification of total RNA and mRNA samples.<br>Includes 25 chips, reagents, ladder and consumables.                 | For 300 samples |

# Agilent TapeStation Systems

# A complete solution for true end-to-end electrophoretic quality control for DNA and RNA samples

Agilent TapeStation systems are automated electrophoresis solutions for quality control (QC) of DNA and RNA samples. The TapeStation systems are all-in-one platforms, which include instrumentation, data processing software, reagents, and ScreenTape devices for analysis of sample size, quantity, and integrity. Delivering highly accurate and precise analytical evaluation, the systems fit perfectly into next-generation sequencing (NGS) or biobank workflows for low to high sample throughput.

### 4200 TapeStation key benefits

- Fully automated sample processing for up to 96 samples
- Sample loading from two 8-tube strips or a 96-well plate
- Complete scalability: Analyze any sample number from 1 to 96 samples
- Reliable, reproducible results within 1-2 minutes per sample and less than 90 minutes for 96 samples

#### 4150 TapeStation key benefits

- Sample loading from two 8-tube strips
- Complete scalability: Analyze any sample number from 1 to 16 samples
- Reliable, reproducible results within less than 20 minutes for 16 samples
- Small footprint saves precious bench space in your laboratory

#### True end-to end sample QC during NGS workflows

The TapeStation systems offer a full range of applications for all steps within any NGS workflow:

- Integrity standards for RNA (RNA Integrity Number equivalent, RIN<sup>e</sup>) and genomic DNA (DNA Integrity Number, DIN)
- QC of cell-free DNA with qualification based of the calculation of %cfDNA
- QC of fragmented genomic DNA e.g. DNA extracted from FFPE tissue
- QC of adapter ligated and amplified NGS libraries
- Analysis of post-capture amplified libraries after target enrichment

cfDNA samples with different amounts of high molecular weight DNA contamination (A), and NGS libraries (B)

As the 4200 TapeStation system is compatible with 96 well plates, the instrument is the perfect sample QC tool for customers with higher-throughput needs.

For labs handling smaller numbers of samples, the 4150 TapeStation system for 1 to 16 samples is the affordable, entry-level alternative.

#### Agilent TapeStation systems

| Part number | Description  | Quantity |
|-------------|--|----------|
| G2991BA     | 4200 TapeStation system<br>For DNA and RNA analysis. Includes the 4200 TapeStation instrument, laptop with TapeStation software, vortexer,<br>accessories, consumables, user information, and installation and familiarization services. | 1 system |
| G2992AA     | 4150 TapeStation instrument<br>For DNA and RNA analysis. Includes 4150 TapeStation instrument, TapeStation software, vortexer,<br>accessories, consumables and user information, and installation and familiarization services.          | 1 system |
| G2999AA     | 1 TapeStation software laptop PC bundle, Laptop PC with TapeStation software pre-installed   | 1 PC     |

The RNA ScreenTape provides a fully automated, efficient and reliable RNA analysis for RNA characterization and quality assessment. The RNA integrity number equivalent (RIN<sup>e</sup>) provides an instant and objective evaluation of total RNA degradation.
